Exploration update

The Company's planned 7,000 metre drill program is underway at Green Springs with two drill rigs active at the property. The program is focused on high confidence step-out holes on known zones of Chainman and Pilot Shale hosted gold mineralization beneath the 2.5 km mine trend, as well as greenfields targets to the East and North of the mine trend. Drilling continues with assay results pending from 26 RC holes, and 7 core holes completed to date.

Due to the timing and focus on the Green Springs program, the drill program at the Pony Creek gold property ("Pony Creek"), has been pushed to 2021. Pony Creek is fully permitted to test multiple undrilled gold targets on trend from Gold Standard Ventures' Railroad project.

The Company's has elected to capitalize mineral property acquisition costs, and expense exploration expenditures as incurred. Accumulated other comprehensive gain of \$0.39 million at September 30, 2020 (December 31, 2019: \$1.40 million loss) is the aggregate foreign currency impact on the translation to Canadian dollars of the value of the Company's portfolio of exploration properties.
